POONGSAN

Small to large caliber ammunition ranging from 5.56mm cartridge to 155mm projectiles for howitzers

Introduction

Poongsan produces a wide range of military purpose ammunition from 5.56mm small arms ammunition to 155mm artillery projectiles with vertically integrated production system encompassing everything from raw materials and components to the load, assembly and packing operations of finished goods.

Application

- Compatible with various types of global weapon systems

Use in Korea

- Republic of Korea Armed Forces (Army, Air Force, Navy)

Ammunition manufacturing machinery and plant from small to large caliber ammunition

Introduction

Based on years of experience and accumulated technology in the ammunition production field, Poongsan developed ammunition plant business and should offer various advantages to its customers.

Application

- Manufacturing small to large caliber ammunition

VITZROCELL CO., LTD.

Contacts: Leo Kang

Add: 70, Indeoseupakeu-ro, Hapdeok-eup, Dangjin-si, Chungcheongnam-do, Rep. of Korea (31816)

**VITZRO CELL**

Ampoule Reserve Battery

Introduction

Lithium based Ampoule Battery has high reliability, wide temperature range (-43°C to +70°C), long shelf life (20 years or more) with short activation time. We service the optimized and customized solutions to the customers worldwide.

Application

- Electronic fuzes
- Calibers
- Naval/Artillery Gun
- Multiple Launch Rocket System
- Remote Anti-Armor Mine System

Use in Korea

- Army, Navy, Marine Corps, DAPA, POONGSAN, HANWHA, GLOBAL DEFENSE COMPANIES

Thermal Reserve Battery

Introduction

Thermal Battery has high power density, high reliability, wide temperature range (-54°C to +75°C), long shelf life (15 years or more) with short activation time. We service the optimized and customized solutions to the customers worldwide.

Application

- Guided Missiles
- Projectiles
- Rockets
- Bombs, Mines
- Decoys

Use in Korea

- Army, Navy, Air Force, DAPA, LIG D&A, HANWHA, GLOBAL DEFENSE COMPANIES

DABEEO INC.

Contacts: Jason Jae Woo Park

Add: 3003 N. 1st St. Suite 314, San Jose, CA 95134

dab&eo

Reading and Interpreting the Earth

Dabeeo Eartheye

Introduction

Geospatial AI platform delivering comprehensive Geo-Intelligence through target detection, classification, segmentation, and change detection on multi-source imagery for actionable decision-making.

Application

- ISR Monitoring
- Target Detection & Classification
- Unauthorized Structure & Vessel Detection
- Change Detection-Based Threat Prediction
- 3D Battlefield Terrain Analysis: LOD 2.x, LOD 3.x
- Terrain Feature Extraction
- Strategic Site Surveillance
- 3D Operational Environment Modeling
- Synthetic Data Generation with 3D Terrain
- Image Registration/Alignment

Use in Korea

- Local Governments, Korea Aerospace Research Institute, National Geographic Information Institute, Korea Asset Management Corporation

Dabeeo MDA

Introduction

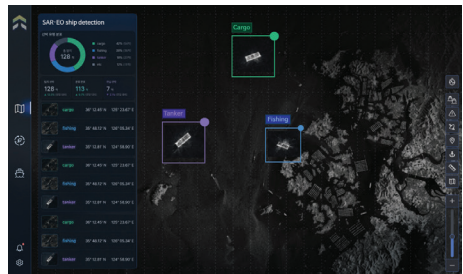

SAR-based AI vessel detection delivering wide-area automatic detection, AIS fusion, and seamless system integration for actionable Maritime Domain Awareness(MDA) intelligence.

Application

- ISR Monitoring
- Target Detection & Classification
- Unauthorized Structure & Vessel Detection
- Strategic Site Surveillance
- Dark Vessel & AIS Spoofing Detection
- IUU Fishing Monitoring
- Maritime Smuggling & Trafficking Detection
- Sanctions Violation (Ship-to-Ship Transfer) Monitoring
- Shadow Fleet Detection

Use in Korea

- Korea Aerospace Research Institute

I-SPEC CO., LTD.

i-spec.co.kr

Total Solution Provider

I-Spec

RF EMP Filter

Introduction

I-Spec's RF EMP Filter protects HF, VHF, and UHF antenna lines from HEMP while maintaining insertion loss below 0.5 dB and meeting MIL-STD-188-125-2 requirements.

Application

- Military communication systems, radar and surveillance equipment, naval vessels, command-and-control systems, shielded facilities, and other mission-critical RF antenna lines requiring HEMP protection.

Use in Korea

- Navy

HEMP Filter

Introduction

I-Spec's HEMP Filter protects power and signal lines from high-altitude electromagnetic pulse threats, ensuring reliable operation of mission-critical systems in compliance with MIL-STD-188-125 requirements.

Application

- Military command and control facilities, communication stations, radar systems, naval vessels, hardened shelters, data centers, power systems, and other HEMP-protected infrastructure.

Use in Korea

- Army, Government agencies

EDGE FOUNDRY CO., LTD.

Contacts: Hyunkyung Park

Add: 385 Expo-ro, Yuseon-gu, Daejeon, Rep. of Korea (34051)

Edge Foundry

Infrared Sensor (320X240, 640X480)

Introduction

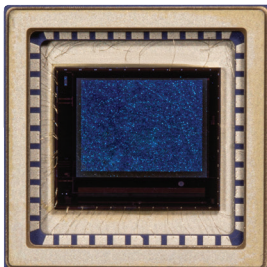

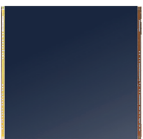

Edge Foundry's CMOS-compatible uncooled infrared sensor is designed and manufactured in-house, delivering high sensitivity, high dynamic range, and reliable thermal imaging performance.

Application

- EO/IR Systems
- ISR Systems
- UAV Payloads
- Target Acquisition Systems
- Border Surveillance Systems

Use in Korea

- Confidential

Thermal Camera Module (320X240, 640X480)

Introduction

The Thermal Camera Module integrates Edge Foundry's in-house uncooled infrared sensor, delivering real-time thermal imaging, multiple interface options, and reliable performance in a compact solution.

Application

- EO/IR Systems
- ISR Systems
- UAV Payloads
- Counter-UAS (C-UAS) Systems
- Vehicle Vision Systems

Use in Korea

- Confidential

CochL.Sense Acoustic Drone Detection

Introduction

Advanced drone detection software powered by acoustic and RF analysis. Deployable across diverse hardware, it covers the blind spots of existing anti-drone systems-specifically targeting low-altitude and fiber-optic drones.

Application

- Force protection and perimeter security against hostile drones at military bases and naval vessels, as well as critical-infrastructure and event security for government agencies.

Use in Korea

- Army, Air Force, Korean Defense Prime

CochL Machine Anomaly Detection

Introduction

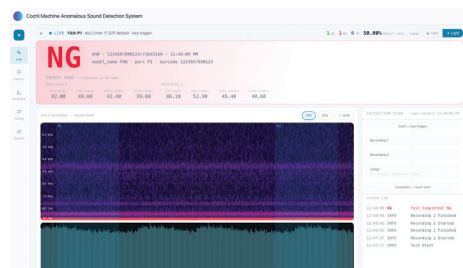

AI-based machine anomaly detection for CBM and MRO. Using microphones and vibration sensors, it identifies abnormal noise and wear, learns from very limited fault data, and automates repetitive maintenance and QC tasks.

Application

- Predictive maintenance and readiness assurance for defense platforms such as helicopters, ground vehicles, and aircraft. Early anomaly detection and remaining-useful-life (RUL) estimation enable condition-based maintenance (CBM+), minimizing unplanned downtime and sustainment costs.

Use in Korea

- US-based Aerospace Company, Manufacturing Plants

FUNZIN CO., LTD.

Contacts: Eric Kim

Add: EAST-13FL, Hyundai Terrace Tower, 7, Yeonmujang 5ga-gil, Seongdong-gu, Seoul, Rep. of Korea (04782)

KWM (Kill-Web Matching)

Introduction

AI command decision-support system that fuses data from diverse sensors-including EO/IR, RF spectrum, satellites, and ETC-to conduct reconnaissance and recommend optimal attack courses of action.

Application

Multi-Sensor ISR and Battlefield Situational Awareness

AI-Based Target Detection, Identification, and Tracking

Operational Planning, Decision Support, and Fires Recommendations

Use in Korea

- Army TIGER Boost Project(2024, ROK Army)
- KCTC Combat Experiment (2025, ROK Army)
- Integrated Military Firepower Exercise (2026, MND)

EagleEye

Introduction

EagleEye is a defense-specialized AI synthetic data platform that generates and manages high-quality training data for military AI models. It supports diverse military scenarios and operational environments and is certified with the DQ Mark by Korea's Defense Agency for Technology and Quality (DTaQ), selected as offset recommendation item by Ministry of Trade, Industry and Resources (MOTIR).

Application

- Defense AI Training Data Development and Management
- Secure AI Development in Air-Gapped Environments

Use in Korea

- ROK Army

K9 Wheeled Mobile Howitzer

Introduction

- The K9 Wheeled Mobile Howitzer delivers high mobility firepower optimized for rapid maneuver operations with common gun system with proven K9A1.
- Its wheeled platform enables faster road movement, reduced logistics burden, and excellent operational flexibility across extended distances.
- Equipped with a 155mm/52caliber gun, it provides precision, longrange strike capabilities comparable to the proven K9 family.
- Advanced digital firecontrol systems allow quick deployment, high responsiveness, and consistent accuracy in dynamic battlefield conditions.
- Designed for modern mobility-centric missions, the K9 Wheeled variant enhances readiness, survivability, and overall combat efficiency for ground forces.

Chunmoo Multiple Rocket Launcher System

Introduction

CHUNMOO MRL System was the first company led R&D program started in 2009, where Hanwha developed and manufactured all the components indigenously and proudly introduced to the market. The launcher and ammunition carrier vehicle has high mobility with excellent cross country performance, while the launcher is capable of firing a variety of different rocket and missiles.

Application

CHUNMOO is designed to effectively suppress the target areas, being capable of neutralizing point of origin safely outside from enemy's firing range. CHUNMOO is now in service as a main artillery power not only in the ROK Army, but in multiple countries' armed forces.

Use in Korea

- ROK Army and a number of armed forces around across the world

LOTUS INTERNATIONAL CO., LTD

Body Armor

Introduction

Quick release Body Armor comes with Ballistic Plate up to NIJ Level III ~ IV.

Application

- Special Force, Military, Police, EOD Squad, Demining, Marine, Rescue forces

Use in Korea

- Police / Law Enforcement

Ballistic Helmet with Visor

Introduction

Ultra-light weight Ballistic helmet with Ballistic Visor up to NIJ Level IIIA ~ III.

Application

- Special Force, Military, Police, EOD Squad, Demining, Marine, Rescue forces

Use in Korea

- Police / Law Enforcement

Riot Control Gears

Introduction

Riot Control Gears include Suit, Helmet, Shield, Mask, Gloves and Gas Launcher.

Application

- Special Force, Military, Police, EOD Squad, Demining, Marine, Rescue forces

Use in Korea

- Police / Law Enforcement

**WDG Series****Introduction**

Our drone camera is a combination of gimbal and payload integrated with a high-magnification EO optical zoom module, IR camera and the LRF.

It enables long-range observation, precise target identification, and distance measurement for various operational environments in defense, public safety, and industrial applications.

Application

- UAV

Use in Korea

- UAV Manufacturer

**AF Zoom Module Series****Introduction**

Our high-magnification optical zoom module featuring Auto Focus (AF), Image Signal Processing (ISP) and Anti-Shock technologies. Our zoom modules are fully compliant from NATO standard of vibration and shock test which are AECTP 400 Method 401 B-4 vibration standard along with AECTP 400 Method 403 Minimum Integrity shock standard.

It enables long-range observation and precise image acquisition, serving as a core module for various imaging systems.

Application

- UAV, EOD Robot

Use in Korea

- Army, Police / Law Enforcement

**DTS100L****Introduction**

- Unique and One & Only Product in the World
- Combination of Thermal + Red Dot + Laser Range Finder for Heavy Machine Gun (12.7mm) Sight
- Manual & Automatic range based ballistic compensation system

**Application**

- M2HB, 20mm, GAU-19

Use in Korea

- Army

DCL120D**Introduction**

- Red Dot Sight for 12.7mm HMG with Anti-Drone reticle

Application

- 12.7mm Machine Guns, 7.62mm Machine Guns

Use in Korea

- Army

**DCL28-L****Introduction**

- Combination of prismatic optic Red Dot Sight with Laser aiming module (Visible, IR Laser, illuminator)

Application

- 5.56mm/7.62mm Rifles 9mm/10mm Sub Machine Guns

MOORI
Technologies

ESH-3

Introduction

Super-compact 1.5 μm eye-safe DPSSL delivering ≥ 3 mJ at 5 Hz. Passive Q-switch, ~ 6 ns pulse width, < 4 mrad divergence. Lightweight (35 g), MIL-STD-810G compliant, -40 to $+71^\circ\text{C}$ operation.

Application

- Laser rangefinders, electro-optical targeting systems, industrial sensors

Use in Korea

- Army

ESH-100

Introduction

Ultra-high energy 1.5 μm DPSSL delivering up to 100 mJ at 30 Hz. Active Q-switch, < 20 ns pulse width. Rugged design (1.4 kg), -30 to $+61^\circ\text{C}$ operation, MIL-STD-810G compliant.

Application

- Flash LIDAR, laser induced breakdown spectroscopy (LIBS), laboratory equipment

Use in Korea

- Army

Short Range AESA Radar

Introduction

A small size MFR capable of detecting not only high-speed aircraft but also small UAVs and drones

- Operate a single search/track mode targeting anti-aircraft targets-Continuous detection/tracking with low-altitude clutter management-Remote operation form Control PC

Application

- Anti-Aircraft Laser Weapon Systems
